**Attachments:** Coded Public Comments.xlsx; OR CZARA Decision Doc 12-20-13[2].pdf; Response to Comments DRAFT 052014.doc

Teresa and Peter,

Thanks for agreeing to be part of the Forestry review teams. I am the Team lead for responding to comments on "Forestry-Riparian", and Chris Solloway is the team lead for responding to comments on "Forestry Roads and Landslides".

Attached below is the link to the NOAA web site which lists the comment letters. Attached above are 1) NOAA/EPA's 12/20/13 proposed decision document, 2) the spreadsheet that summarizes the points raised in the comment letters, and 3) the draft example of how to build a response to comments. All four will be helpful in the review process.

I am also putting together a rough narrative on an approach for completing a Team review. I will send it your way when I get it done. It will be the path I will follow for Riparian Team review and for the Ag Team review (the other team I will be working with). I am not sure how Chris will work with his team but I suspect it will be very much like what we'll use in completing the riparian review.

Chris' team (Roads and Landslides) includes the three of us (Teresa, Peter and me) and Chris. The Riparian team includes the three of us and Jenny Wu.

I am sure Chris will be touching bases with us soon on the R&L review.

Don't hesitate to give me a call if you have any questions.

Again thanks for helping on this.

Alan

Katie and Roberta,

Below is the NOAA link for the comment letters. Attached are the 12/20/13 proposed decision document, the spreadsheet with the coded public comments, and the "Response to Comments" draft format. I still need to get you the 2004 letter re: the interim approval of the Ag management measures.
